VELJKO GALOVIĆ

Full-Stack Developer · Founder of LodgeTrack · Building production software end-to-end

Sombor, Serbia | veljkogalovic@gmail.com
github.com/VeljkoGalovic | linkedin.com/in/veljko-galovic

Hackathons & Competitive Achievements

- **2nd Place** DevFest 2026 Hackathon
- **Finalist** Bubble Cup 16 & 17
- **3rd Place** National mathematics competition (2024)
- **Honorable Mention** IOAI Beijing China (2025)
- **Finalist** IAIO ML & AI Competition, Slovenia (2026)
- **2nd Place** National mathematics competition (2026)

Shipped Projects

LodgeTrack property management SaaS (multi-tenant)

Founder & CEO · lodgetrack.com

- **Solo software engineering:** designed, built, and shipped end-to-end as a one-person team: Next.js + React + TypeScript on the front, Prisma & PostgreSQL underneath, Tailwind design system throughout; deployed behind a production pipeline with live auth & billing.
- **Multi-tenancy done properly:** organization-scoped data isolation via PostgreSQL row-level security, custom Units/tenants API, email invitations, key-based API access and rate limiting.
- **Monetized from day one:** full Lemon Squeezy payment integration with webhook-driven subscription state; multilingual product UI.

MarketingAssistant (Marketing automation & lead-scouting platform)

Builder · TypeScript, Node, SQLite, MV3 Extension

- **Automated lead-scouting pipeline:** Engineered a 24/7 background daemon in TypeScript and Node for multi-channel lead discovery, unified deduplication, and SQLite storage.
- **Human-in-the-loop safety architecture:** Integrated free-tier LLM drafting with a Telegram control center for manual review, enforcing strict read-only browser extension limits and dry-mode safeguards.

Technical Stack

Frontend
Next.js (App Router) · React · TypeScript · Tailwind CSS

Data & Backend
PostgreSQL · Prisma · auth & payment webhooks

Systems & Tooling
C/C++ · Git · Linux (Fedora daily driver)

Engineering Focus
Independent end-to-end execution, robust code architecture, 100+ production commits shipped solo

Education & Background

Secondary school: Advanced Mathematics, Algebra & Computer Science track

Sombor, Serbia

- **Advanced curriculum:** Deep-dive mathematics, software engineering and competitive programming. Active on national and international programming, AI and hackathon competitions since 2024.
- **Outside the terminal:** Over a decade of dedicated martial arts training, building long-term discipline, resilience, and focus.
